

EN SKROSS® travel adapter for use in Brazil, Italy and Switzerland, type J/N/L

max. 10A, max. 2300W/230V~, max. 1000W/100V~ (order no. Solight: PA71)

A travel adapter is a reduction that allows you to connect the plugs of EU appliance power cords to sockets in Brazil, Italy, Switzerland and countries with a similar standard. Before traveling to your destination country, make sure that the selected adapter is correct at www.power-plugs-sockets.com. The adapter does not change voltage, current, polarity, or other electrical quantities. When using, install the adapter in the socket and then connect the appliance to the adapter. When disconnecting from the mains, proceed in the opposite way. The adapter is intended for short-term use, not for permanent electrical loads. After use, unplug from the socket.

A Output compatibility

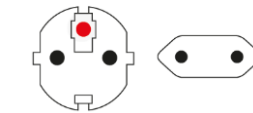

Switzerland

Italy

Brazil

B Input compatibility

Schuko
Type E/F
(grounded)

Euro
Type C
(ungrounded)

ADJUSTING THE ADAPTER

The middle (ground) pin is movable. Push it into the desired position, corresponding to the type of socket.

The individual positions are equipped with a safety mechanism that emits a distinct "click". Only then is the pin safely placed in the working position.

It is necessary to make sure that the pin is in a perpendicular position, parallel to the other two pins (not at an angle).

Only one device may be connected to one adapter.

SAFETY WARNING

The adapter is not a voltage converter or other electrical quantity converter. The input voltage of the connected device must match the voltage of the local electrical network. Always check these parameters before using the adapter. This will prevent possible malfunctions. Always use the travel adapter only when dry and clean. Suitable for indoor use only (IP20). It must not be exposed to liquids or moisture, or to temperatures above 60 °C. Do not insert any objects, wires, clips, etc. other than the power cords, into the openings of the travel adapter. It must not be used with a damaged housing, to charge electric vehicles or in connection with multiple sockets, power strips or extension cords. Clean with a dry or damp cloth, let dry thoroughly. Always clean when disconnected from the power supply. Keep out of the reach of children. Do not tamper with the connections!

Incorrect use of the product is grounds for termination of the manufacturer's and seller's warranty and refusal of any financial compensation or compensation for personal injury.

MANUFACTURER'S DECLARATION - Warranty and Limitation of Liability

This product has been developed to meet international safety requirements. The user must handle the product with due care and caution. The warranty expires after 24 months from the date of purchase and is limited exclusively to the replacement of a defective product. With the exception of the replacement of a defective product during the warranty period, WorldConnect AG is under no circumstances liable for direct, indirect and/or consequential damages caused by (i) a defective product, (ii) force majeure, (iii) misuse of the product beyond its intended purpose, (iv) use contrary to the instructions for use. Any liability for lost profits, downtime, loss of data and other losses and/or damages resulting from the proper use or misuse of the product is excluded. We reserve the right to make changes.
